

Inf-17 Information computer

Information computer Inf-17:

- Bright 17" display
- Touch screen
- Low energy consumption
- Wireless LAN(Wlan)
- Slim design with thin screen

Nice slim design with the computer built-in in the pillar!
Can be coated in different colours.

Area of usage:

An information computer perfect for the office, store, exhibits or other public places where something should be shown such as at car stores, museums, furniture stores etc. Can be equipped with motherboard for multimedia, with support for sound and movies. On the screen there can be shown pictures, commercial movies, a homepage with information or similar. Printer can be connected so that customers can print product information.

Construction:

Inf17 is a breakthrough for the new generation of thin and compact information computers. The computer is housed in the bottom of the pillar which makes the screen very thin. The screens are only 6cm thin and extremely quiet. Fanless construction which is sealed to keep dirt away and keep the computer as quiet as possible. All the chassis is made in aluminium. Customer adapted chassis is available such as transparent or coloured coating, milled-in logotype etc. A glass plate in front of the LCD-screen, 1GHz processor (option 1,6-2GHz) and 512mb memory as standard.

6cm thin screen!

keyboard as option.

Option:

- keyboard
- external CD/DVD
- 12", 15" or 19" display
- printer

Keyboard on
touchscreen as
option.

On the display there can be shown a homepage, pictures, commercials etc.
